

# HOTEL SOLUTION

## INQUE Group

INQUE was born to provide Kitchen hardware solutions in Mumbai, India. Today, we are also providers of shutters and cabinetry. For us, providing the best customer service, customer experience and company culture is of utmost importance.

INQUE is a homegrown brand with its established, experienced and esteemed roots founded by a family that created ENOX.

A firm foundation for Pooja Hardware Pvt. Ltd. was laid down in the year 2007 with the brand ENOX with its product portfolio comprising Glass hardware, sliding solutions, door control, furniture fittings and kitchen hardware.

With time being grateful, our hard work helped us reach a commendable milestone of sales volume which progressively increased year on year.

In the year 2014, A Swedish multinational company named ASSA ABLOY acquired ENOX, with the branch of business that deals in locks and hardware. At that time, We were the market leader employing 220 passionate employees in our team. Since, the Kitchen Hardware business was not acquired from our product portfolio, we decided to continue our Kitchen Hardware under the INQUE brand with Pooja Hardware.

To take INQUE to a different height, we have started a new company named Inque Solution LLP. Inque Group of companies have acquired multiple brands, out of which AVEO Hardware India Pvt. Ltd. is one of its prized possessions.

Security is your concern; and ours is specialty. At RIOO, we believe your assets deserve better security that's easy to set up and use, and requires minimal attention and care while providing security and ease which cannot be compromised.

Established in 2015 as a Digital Door Lock brand, RIOO now has complete door hardware solutions along with home automation under its umbrella of products & services. A professional security smart solution provider, RIOO was born in Mumbai, India with its wings spread all across the country. With its distinct features in the digital lock systems, we have superior quality Digital Locks with 5-in-one features.

Our Keyless Solutions bring you the convenience to unlock your main door lock with Fingerprint, RFID Card, Mechanical Key, PIN Code or Mobile APP. Our Digital And Mechanical Security Locks (Mortise, Deadbolt, Rim, Cabinet) are continually pushing the limits of home security which works easily with doors.

Our locks are safe, strong and secure and have been tested to withstand adverse conditions. Not only are they technologically advanced but also have a high style quotient. With its sleek and contemporary design, they can aesthetically elevate your spaces. Customised designs are available for commercial, multi-family and mixed-use applications. RIOO products offer quality and value together while continuing the tradition of excellence every day. Today, countless people trust us and we believe it's just the beginning.

### VISION

To upgrade the community by evolving from the traditional mechanical locks to digital and affordable Door Lock Solutions.

### MISSION

To present an excellent digital & mechanical door solution hardware range with latest technologies and commendable service to our valued customers globally.

**RIOO BLUETOOTH HOTEL LOCK SYSTEM**

RIOO Bluetooth hotel lock solution is good choice for hotels/apartments/rental etc., It provides comprehensive functions such as **room property management, device management, room status management, authorization management, staff management, multi-function card management, reports, abnormal check-in alarm and PMS interface.** This system developed around rfid cards, Bluetooth and passwords. For example, has managing card function such as master card, building card, floor card. Support multi-terminal login (issue card from more than one computer). Support Windows / IOS / Android. **Provides a contactless check-in experience to guest.**

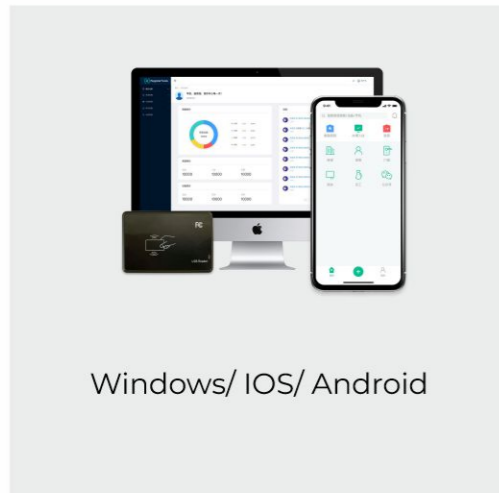

**Device control**

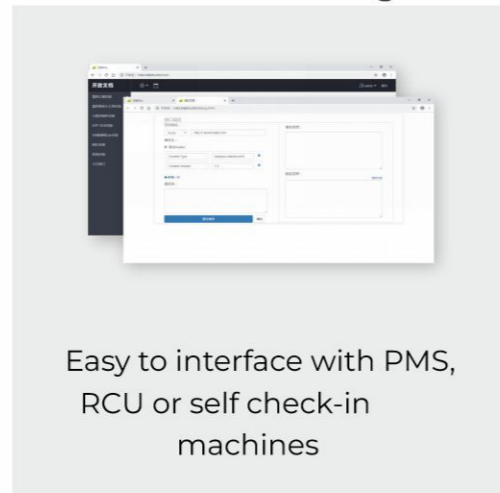

**Cloud+local Server framework**

**Issue card in multi-device**

**Interface docking**

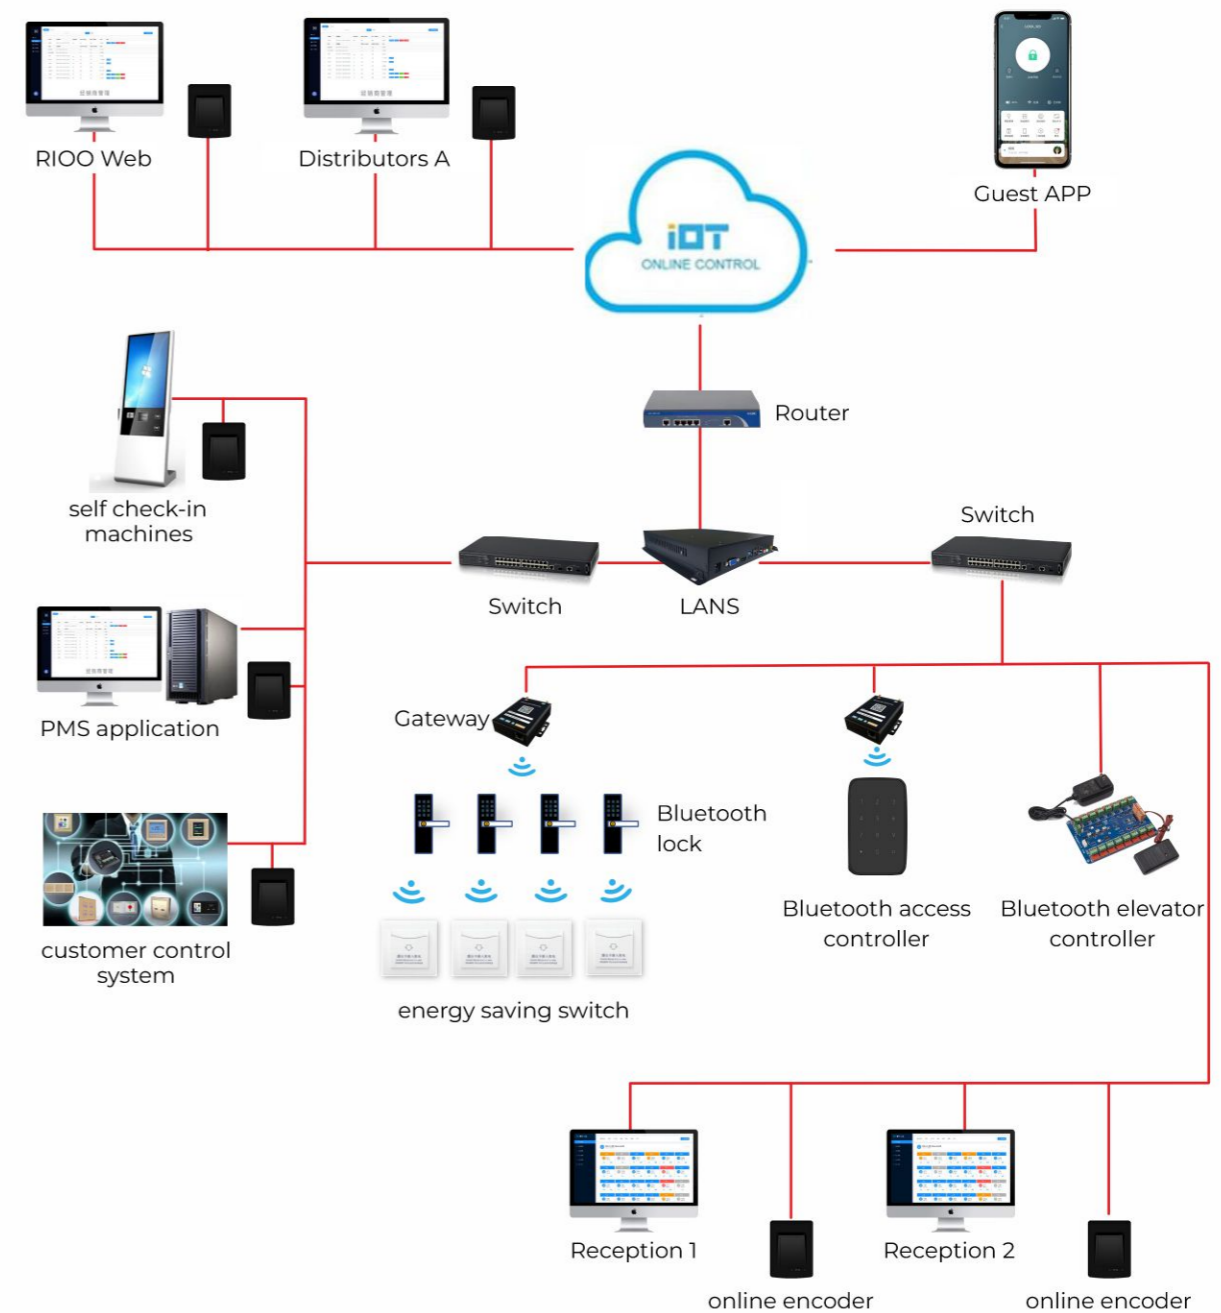

**“LOCAL + CLOUD” DUAL SERVER NETWORK HOTEL LOCK SYSTEM FRAMEWORK**

**System and PMS interface features**

1. Self-check-in, customer control system and third-party PMS only need one more network cable for docking
2. Support network issue CARD, IOS can issue too.
3. Expand APP unlocking. It doesn't need a third party to develop APP terminal, just send a request to the local area server network
4. Quickly connect with other project solution system

**Networked hotel lock system**
